

YOUR #1 CHOICE FOR COMPRESSED GAS CYLINDER COMPONENTS

American Cap Company is one of the world's largest manufacturers of compressed gas cylinder components. For more than 20 years, we have provided cylinder caps, collars and other components for industrial gas, LP gas and specialized gas cylinders. We serve customers throughout North America, South America, Europe and the Far East.

SAFETY- SNAP CAP

PRODUCT USE:

Safety and security are hallmarks of the products we produce. The Safety Snap Cap was designed for safety and valve access security. This design affords easy access to the valve handle without having to remove the protective cap and replacing the regulators each time access to the cylinder is needed. This cap provides safety and security for the valve with the regulator attached. Once the cap is mounted to the cylinder and the regulator is attached, unauthorized access to the valve handle can be achieved by locking the cap into position. For day to day usage of the cylinder, the lock is removed, and the cap is opened for access to the valve handle.

KEY FEATURES:

- Limits Access to Hazardous Gases
- Available for Oxygen and Acetylene Cylinders
- Meets ISO 11117, DOT 49 CFR, CSA B340, CGA V-9 and EN 962 Standards

OPTIONS:

The Safety-Snap Cap comes with a standard finish of safety yellow, but we also offer any custom color.

The Snap Cap can also be lettered for identification purposes.

PART NUMBERS

PART NUMBER	DESCRIPTION
SC8FNNP-12	HIGH PRESSURE 3.125 X 11 UN FINE TREAD, SAFETY YELLOW
SC8CNNP-12	HIGH PRESSURE 3.125 X 7 UN COARSE TREAD, SAFETY YELLOW
SC2FNNP-12	LOW PRESSURE 3.5 X 11 UN FINE TREAD, SAFETY YELLOW
SC2CNNP-12	LOW PRESSURE 3.5 X 8 UN COARSE TREAD, SAFETY YELLOW
