

YOUR #1 CHOICE FOR COMPRESSED GAS CYLINDER COMPONENTS

American Cap Company is the world's leading manufacturer of compressed gas cylinder components. For 29 years we have provided cylinder caps, collars, flanges, foot rings, lids, neck rings and other components to insure the safety of Industrial, LPG, CNG and Specialized Gas cylinders. We take pride in serving our customers Worldwide.

CYLINDER NECK RING

PRODUCT USE:

The cylinder neck ring mounts to a seamless high pressure cylinder to provide a means of attachment for the cylinder valve protection device, whether it be a cap, valve guard or other valve protective device. Due to the varying boss sizes on cylinders, our neck rings are custom made to fit your manufacturing needs. The most common sizes are maintained in stock at our Wheatland facility. The neck ring can also double as an identifying label on the flange of the neck ring by embossing your company name, logo and phone number if desired.

KEY FEATURES:

- Zinc Plated
- High Quality Steel
- Rolled threads that provide better characteristics & higher strength
- Available with or without nibs, (typically there are 0, 3, 5 nibs.)
