

YOUR #1 CHOICE FOR COMPRESSED GAS CYLINDER COMPONENTS

American Cap Company is the world's leading manufacturer of compressed gas cylinder components. For 29 years we have provided cylinder caps, collars, flanges, foot rings, lids, neck rings and other components to insure the safety of Industrial, LPG, CNG and Specialized Gas cylinders. We take pride in serving our customers Worldwide.

SPUD

PRODUCT USE:

The spud provides a method for attaching the cylinder valve to the cylinder. This product also provides security in respect to acetylene cylinders.

KEY FEATURES:

- Spuds provide a method for attaching valve protection devices.
- All OD thread forms and sizes available
 - 3-1/8 x 11UN & 3-1/8 x 7UN
 - 3-1/2 x 11UN & 3-1/2 x 8UN
 - 3"-8NPT
 - 80W x 11 Whitworth Form
 - 89W x 11 Whitworth Form

OPTIONS:

Some styles provide fuse plugs containing lead, which is used in the case of a fire. If they were exposed to a fire that reached 200 degrees Fahrenheit the fuses would discharge out of the spud and release the gases to avoid an explosion.

NPT, NGT, BSPT, & ISO ID thread sizes for valves and fuse plugs
